

ENVIRONMENTAL POLICY

Golledge Electronics recognises that its activities have an impact on the environment. In all our activities, working practices and business relationships, we are committed to protecting and conserving all aspects of the environment over which we have control or can influence. To that end we have developed an Environmental Management system with the following policy:

POLICY

We are committed to prevention of pollution in so far as our Environmental Scope allows. As a bare minimum we shall ensure compliance with all relevant environmental legislation and regulations and internal environmental procedures. Over and above this we shall continuously strive to improve our environmental performance. In particular we:

- Take environmental considerations into account when selecting suppliers and contractors, thus reducing pollution
- Further reduce pollution by using resources wisely, reducing usage and reusing or recycling wherever possible.

We ensure this policy is implemented throughout our operations by:

- Reviewing this policy and its effectiveness on a regular basis
- Monitoring waste
- Training each and every member of our team to understand the environmental impacts of their own jobs
- Where possible selecting suppliers who have, or are striving for, ISO14001 compliance.

In addition we actively encourage our employees to apply the environmental consciousness gained from their working life to their own private lives.

We comply with the principles of ISO14001 and strive to maintain full Regulatory Compliance.

This Policy is reviewed regularly, and updated if required, to ensure Environmental Objectives are set which meet the needs of all Golledge Electronics' stakeholders.

Jonathan Golledge
Managing Director
